Ideation Phase
Empathize & Discover

Date	31 January 2026
Team ID	anshrathore0202-cyber
Project Name	F1 Racing Intelligence Analysis
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS

- "Comparing driver performance across different eras with raw CSV files takes too long."
- "I want clean visual dashboards that show lap times, pit strategies, and standings together."
- "Static F1 tables don't reveal how constructor upgrades impact race weekend results."

THINKS

- F1 telemetry holds rich insights that are currently locked behind fragmented sources.
- Interactive Tableau dashboards could make race statistics engaging for both fans and technical analysts.
- A unified data pipeline will save hours of manual data wrangling before every analysis.

F1 ANALYST

(Motorsports Fan & Data Storyteller)

DOES

- Downloads historical race data, lap times, and constructor scores into local VS Code projects.
- Builds data pipelines and cleans raw telemetry tables to structured formats.
- Creates custom Tableau visualizations to showcase driver progress and team performance trends.

FEELS

- **Frustrated** when dealing with missing fields and inconsistent historical dataset structures.
- **Motivated** to unlock hidden correlations between qualifying positions and final podium finishes.
- **Confident** when presenting interactive visual insights that tell a clear racing story.
