Project Demo Planning

Date	15 March 2026
Team ID	XXXXXX
Project Name	XXXXXX

1	Project Overview & Agenda	Introduction to F1 telemetry analytics and business objectives	2 mins	Team Lead
2	Snowflake Data Architecture	Data ingestion, staging, cleaning, and transformation pipelines	3 mins	Data Engineer
3	Live Streamlit Dashboard	Interactive exploration of lap times, top speeds, and tire metrics	5 mins	Frontend Developer
4	Telemetry & Race Strategy Insights	Detailed walkthrough of business questions and visual reports	3 mins	Analytics Lead
5	Testing & Validation Summary	Overview of performance testing, data accuracy, and reliability checks	2 mins	QA Engineer
6	Q&A and Conclusion	Addressing evaluator questions and outlining future scope	5 mins	All Team Members

6				

Welcome evaluators, state the challenge of analyzing F1 telemetry, and introduce project goals.
Present end-to-end architecture leveraging Snowflake data warehousing and Streamlit.
Showcase live dashboard tabs, interactive filters, lap time trends, and weather telemetry comparisons.
Open floor for questions, clarify technical queries, and summarize key project outcomes.

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	
2	Solution Overview	
3	Live Feature Demonstration	
4	Q&A Session
